

## **Taline Temizian (b. 1978, Fresno, USA)**

Taline Temizian (b. 1978, Fresno, USA) is a London-based artist whose paintings, works on paper, multi-media works, Kinetic & Light installations use figurative, conceptual and process-based strategies systems and signs to explore the interplay between personal narrative and cultural history through science, technology, art and poetry. Temizian's practice is characterized by a wide range of influences, from modernist painting and anthropology to contemporary medical imagery and research, particularly that of cardiology and neurology.

Temizian's versatile practice is characterized by a wide range of influences, from modernist painting and literature to contemporary medical imagery, particularly that of cardiology, neurology and its' link to Memory and Trauma.

Her current project is The Networks projects that works with Systems, language and signs and possibilities. Temizian has showcased her work internationally and her art is in both private and public collections. Her work has been seen in Art Basel, La Biennali di Vinizia, Saatchi Gallery and many other museums, exhibitions and galleries around the world.
